Experience

Business developer at Västervik Milö och Energi AB   September 2025 - Present

Streamlining and improving processes and system support.

System development project at Sitevision AB, internship   January 2025 - June 2025

System integration meant to visualize build processes from external services, e.g. Jenkins. [React, JavaScript, REST-API]

Student mentor at Örebro University, Informatics Committee   October 2023 - January 2025

Teacher's assistant in C#, intermediate course, whilst leading code workshops.

Warehouse associate at Lidl Sverige AB, Örebro   June 2023 - August 2023

Picked orders using a picking truck and ensured accuracy and high standards in warehouse processes.

Preschool assistant at Älvdansensförskola, Västervik   October 2020 - August 2022

Responsible for children's development and well-being at preschool. Close collaboration with both colleagues and guardians.

Personal Portfolio

The portfolio website mainly includes more about me and my projects, showcasing my skills in software development. These include an ASP.NET MVC web application with an SQL database, a Java-based business management system using MySQL, a WinForms program for podcast management, and a Python tool that converts images to ASCII art via a custom CLI.
All projects are documented on GitHub.
